

Employment History	Skills
<p>Feb 2013 To Sep 2013</p> <p>Sparktz Contract Work <i>Web Designer/Developer</i></p> <p>Developing the front end, via HTML, CSS, jQuery, AJAX as well as a small CMS via PHP and jQuery, HTML and CSS for an as-yet unannounced betting platform/website. I was initially being fed designs from an in-house designer via PSD which I then recreated in code, however in the latter months of the project I was tasked with updating some areas to fit with more contemporary design standards.</p>	<p>Technical</p> <p>HTML & CSS JavaScript & jQuery PHP MySQL and Database Design AJAX Responsive Implementation</p>
<p>Jan 2012 To Feb 2013</p> <p>Worldlink Sport, Reigate <i>Web Designer/Developer</i></p> <p>I was tasked with building numerous white-label front-ends and WordPress themes (built entirely from scratch via HTML, PHP, CSS, etc.) I was also in charge of keeping these pages updated with content, making design changes when required as well as technical support for sites for external clients - which in turn gave me experience with using WordPress and Joomla. I was in charge of writing up technical documentation as well as writing and designing user guides for some of the mobile app.</p>	<p>Design</p> <p>Photoshop Illustrator Flash Mobile Friendly</p>
<p>2010 To 2012</p> <p>Worldlink Global, London <i>IT Technician/Web Developer</i></p> <p>Initially hired as a Junior IT Technician, I was in charge of managing the internal network as well as installing new hardware when required. I was moved department once it was established I had some basic web design skills as they required extra hands on a project. I made enough of an impression that they left me in this position for the duration of my employment.</p>	<p>Misc</p> <p>Ability to write technical documentation for non-technical users. Enjoy working as part of a team or independently. Dedicated to learning and improvement.</p>

Profile

Over the last few years, I have devoted a lot of my time and interest towards web design and have devoted a lot of this time to improving my skills and understanding.

I am well versed in HTML, CSS, jQuery, PHP and MySQL as well as some basic AJAX and have a good understanding of responsive design. I am also proficient with Photoshop and Illustrator and have some skill with Flash advertisement creation. I understand the key concepts to designing an accessible front end although I am always looking for ways to improve and to keep up with new design concepts.

I am good with communication on projects and keeping everyone involved up to speed as well as working to tight deadlines. I have experience with keeping on top of last minute changes as well as adhering to modern standards. I'm a strongly self-motivated person and care a great deal about the quality of my work. Outside of work I am interested in 3D Art, Games, and Graphic Design.

Education

<p>The University of Lincoln <i>BSc. (hons) Computer Games Design (2:1)</i></p> <p>This degree included a wide variety of modules covering design aspects as well as technical. The design aspect took my interest most allowing me to learn about UI design and good interface practises, Photoshop, Illustrator, 3D modelling and Web Design.</p>	<p>The Sixth Form College, Farnborough <i>A – Levels</i> Computing, English Language/Literature, Psychology</p> <p><i>AS Levels</i> Photography, Media, Information Technology</p>
